

Research Exchange (ReX)

Smarter, simpler submission

Submitting a manuscript is often harder than it should be. That's why we created Research Exchange.

Here's how submitting a manuscript in ReX works:

Drag and drop your manuscript files

ReX scans your manuscript and extracts key information—no re-typing or copying and pasting needed

Verify the information ReX has identified

Review your submission and click submit

Submitting through Research Exchange takes a fraction of the time of traditional manuscript submission

What are authors saying?

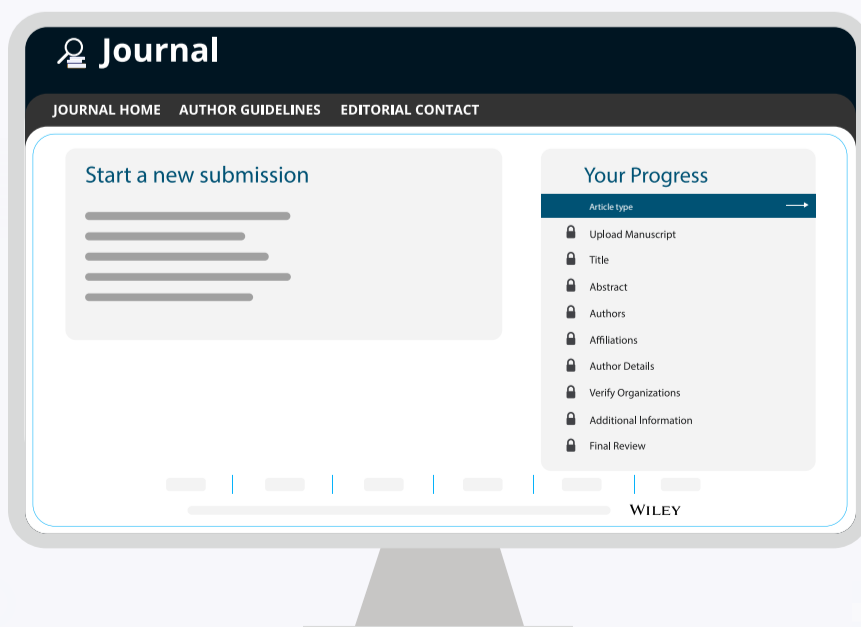

"The easiest submission process I have experienced for any journal."

"Fantastic and hassle-free submission."

"Such a time saver!"
