

Your Published Research Has a New Home

Introducing an advanced platform to support advanced research

Wiley Online Library has migrated to a new flexible, forward-facing publishing platform hosted on Atypon, the leading scientific and scholarly digital platform provider.

This transition is part of a larger commitment to enhance the technology that supports our extensive breadth of scholarly content. Our goal is to drive impact and engagement, and make it easier for users to access the most relevant content.

The new platform enables authors to focus on publishing research and advancing knowledge within their fields while realizing greater support to connect readers to their work. With features that help readers to locate the right content, authors can feel confident that their findings will be highly discoverable to everyone who needs them.

Here's what's new:

Enhanced Promotion

Built-in search engine optimization (SEO) makes it easier for researchers and readers to discover an author's content through external search engines like Google.

Expanded Reach

Peers and other users can find your published work through intuitive features like automated content recommendations that are based on readers' activity and interests.

Streamlined Search

Readers will locate your content quickly with improved search capabilities, such as auto-complete, highlighted search terms, filtering to accessible content, and more search filters.

What this means to you:

Connect Your Readers to Relevant Content

- Experience improved search capabilities that make it easier for readers to find your content
- Improve the way readers receive information with ranked and topically relevant content
- Discover most accessed, most cited, and most recent articles, in our journals

Drive Engagement & Promote Discoverability

- Attract new readers from within Wiley Online Library through content recommendations
- Maximize discoverability with capabilities that make your article more SEO-friendly
- Disseminate your research throughout the community with features like social media sharing

Experience a Fluid & Intuitive Platform

- Benefit from continual updates, without having to manually upgrade any software
- Deliver your article on any device. The entire platform is optimized for desktop, tablet, and mobile browsers
- Provide an ideal experience to readers through the fresh, modern, and responsive design
