### What are Registered Reports?

Authors have the option to pre-register their work, and have their proposed methods and analyses reviewed, before conducting the actual research. A journal can consider accepting the study before the results are known. The submitted research plans are evaluated through peer review based on the importance of the research question and the quality of the author's work.

Wiley journals offer Transparent Peer Review

### What is Transparent Peer Review?

Journals participating in our Transparent Peer Review initiative have the peer reviews' reports, authors' responses, and editors' decision letters published alongside each accepted article. This process is still fully compatible with journals using single-or double-blind review during the review process. Authors are given the option to opt-out of transparent peer review during submission. Reviewers have the option to remain anonymous.
